THE CITIZEN.

A Baking Powder Matter.

The Albany, N. Y., Journal some time since published an interesting report upon the subject of baking powders, in which it gave the results of some tests of an elaborate character made for the purpose of determining the question of which is the best and wholesomest of these articles. The analyses and tests required were undertaken by Professors W. G. Tucker, of the Albany Medical College, and W. P. Mason, of the Rensselzer Polytechnic Institute, of Troy, chemists of the highest standing and reputation, well known for their extended and valuable services as public analysts. Messrs. Tucker and Mason the Journal stated, had been directed to procure from dealers in Albany and Troy packages of baking powder, to analy e and critically examine them, and to make | graces himself when he lends himself to their reports of facts found entirely with-

The report proved a matter of interest and importance and was widely copied and commented upon. From the facts presented, housekeepers had no difficulty in determining for themselves the best and most wholesome baking powder to use. The Journal, its facts having been questioned by a local baking powder-manufacturer, returns to the subject and publishes the following interesting interview with Professor Tucker. The facts before stated are reaffirmed and emphasized in the most breezy manner!

A Journal reporter recently visited Prof. Tucker for the purpose of gaining further information in reference to the baking powder question. He was found in the extensive laboratory of the Medical College, hard at work, but good naturedly submitted to an inquisitorial interview, the substace of which, here given, will be found of interest.

"Doctor," said the reporter, "It appears that one of our local baking powder manufacturers attempts to discredit the report some time ago published in the Journal with reference to baking powders, for which the analytical examinations were made by yourself and Prof. Mason. Were your analysis and opinion printed correct-

"They were," replied Prof. Tucker, "lit-

"Is there any part of the report, or of your views expressed therein, that you

would modify?" "Not a word. My examination was most carefully and accurately made; the deductions I drew from the tests were the inevitable ones, and the opinions I expressed were unquestionably correct."

"You say, Doctor, that the Royal baking powder is superior to any other baking powder which you have examined?" "That is my report."

"Have you examined many other baking powders?" "Quite a number. "

"Wherein, Doctor, consists the superiority which you find in the Royal over other brands?"

"As stated in my report, in the great purity of its ingredients, in the unquestioned propriety and wholesomeness of those ingredients, in the exact proportions of the same, and the chemical accuracy and skill with which they have been combined. As I said before, it is, I believe, a baking powder 'unequaled for purity, strength and "Doctor, the Journal's lady readers

would like you to inform them what are the peculiar virtues of a good baking powder over other and more old-fashioned methods of raising bread, biscuit and

"That would require a long answer, something in the nature of a lecture. Briefly however the advantage of such a baking powder over yeast consists in the quicker work it accomplishes, in the preservation of some of the best elements of the flour which are destroyed in the production of the carbonic acid gas by the use of yeast, and in the absolute certainty of sweet, light and digestible food. Over other methods for quick raising, the merits of a pure baking powder are great. It is always ready for use, the scid and alkali are combined in exact proportions to produce definite results, or to render the largest amount of leavening gas and leave nothing more than a neutral residuum, which is not the result where cream of tartar and sods are bought separately and mixed in the kitchen, for it will always occur where this is done that one or the other of these substances will predominate, making the food yellow, heavy and unwholesome. Besides, the cream of tartar which can be procured by the housekeeper is mostly adulterated, adding to the uncertainity of the results or the unwholesomeness of the food. All these difficulties are avoided in the use of a pure, properly-made baking

"Will baking powders keep? How long will they hold their strength?" "If properly made, until used. A perfect baking powder must combine superlative strength with power to retain it in definitely. Baking powders generally are robbed of the necessary preserving agent in order to give present strength, or else have their efficiency largely destroyed by the addition of large quantities of flour to prevent premature decomposition. The method by which both these qualities are retained in the highest degree produces the perfect article, and this, I believe, is fully accomplish d in the Royal baking powder. I have seen an analysis of baking powder which showed 21 per cent. of Rochelle salts. The baking powder was not fresh, and because of the improper manner in which it had been made the ingredients had combined, forming the purgative salt. I give this as an illustration of those baking powders whose keeping qualities are sacrificed to present strength. How to get both strength and keeping

"Doctor, what about ammonia in baking

quality is the secret of baking powder suc-

"Sesqui-carbonate of ammonia is some times used in the higher class of baking powders."

"Is it injurious or objectionable?" "Nonsense! Quite the centrary. It has been used for generations in the finest food. It is a very volatile agent. Heat entirely evolves it into gas, leaving no residuum. Were it used in sufficient quantity to do the entire work of seration, I am inclined to believe it would be the seme of leavening agents. Some of the highest au thorities, as Hassall, recommend its exclusive use for this porpose in preference to yeast or other kinds of leaven. It is universally admitted to be a wholesome and valuable agent, and no chemist of reputation will class it otherwise. I have become indignant when I have read the stilly charges that have frequently been made

through ignorance or otherwise against it. "Then those manufactures who advertise that their powder does not contain

"Confess that their powder lacks a most seful, wholesome and excellent ingredi-

"Its origin and method of preparation are no more filthy than are the origin and preparation of bread All this talk about ammonia in baking powder and its filth origin is the veriest rubbish. A man dis-

"But they say its origin is filth?"

any such statements. It is particularly unfair for baking powder manufacturers to seek to pervert the truth, or prejudice the ignorant or unwary by such statements that it is either harmful or dirty. Ammonia exists in the very air we breathe. and is largely present in nature as a wholesome substance."

A Mexican Holiday.

The night of Oct. 31, known in the served here with a universality that is not to be met with in our own country and in a very different fashion. It fell this year on Sunday, and about 7 p. m. on that day I found myself mingled with a crowd of people who were pouring along the Calle de San Francisco into the Plaza Mayor, within whose elegant zocolo a fine military band was sending forth strains of delicious music. Both the Plaza Mayor and the Plaza de la Constitucion presented a most brilliant sight. They had been converted into a temporary fair ground crowded with innumerable booths, within which were displayed, by the light of hundreds of tallow candles, around which shades of white paper had been placed to increase their power, every conceivable variety of holiday wares. Nuts, raisins, oranges, figs, tortillas, bananas, can dies, pulque, cakes, toys, hot sausages and notions were visible in endless profusion.

There are occasions when appetite, which is common to both clowns and gentlemen, is strangely tempted by such ministry and dis-play of estables, and doubtless did not the 'mode" and point of honor-sadly misplaced by both sexes-whisper forbearance more than one lechugino (anglice dude) and delicat senorita would be seen devouring, with a hearty relish, morsels intended for the more nomely mouths of peons. Troops of young brats, trusting to their legs and lungs to procure them customers, go winding through the crowd, offering circles of flour paste fried in oil, which are held upon a long lath, held by the middle to prevent them from breaking. It is surprising to see how rapidly the laths are eased of their burden and the brittle fry consumed. The kitchen is not far off, and two cooks in their shirt sleeves are busily engaged in producing fresh supplies. One of these keeps a large iron pan over a stand of charcoal, where it fries and hisses most invitingly, while the other, seated before a vessel filled with water and a pan containing the flour paste, forms the cake in a moment and draws it out into a hollow ring. Thence he flings it into the bubbling oil, where it browns

and swells into a crisp mouthful. CURIOUS MEMENTOES. But in all this beterogeneous collection of wares what strikes a foreigner as strangest of all are the numerous quaint articles designed to be purchased as souvenirs of the occasion. Students of old English customs have heard of soul cakes, a sort of bun which good-natured people used to prepare in large numbers to give to children who went about from house to house on Hallowe'en singing a song and demanding the "soul cake" as a reward, but the booths in the Plaza Mayor on Sunday night displayed soul cakes which, for appropriateness and elaborate design, far surpassed the Hallowe'en buns of Old Eng-

land. They consisted of three layers of cake

so placed as to form three steps, covered with

white icing, and leading up to a chocalate cross at the extremity of the topmost layer Upon each of the other layers there was some design in chocolate intended to remind the purchaser of the solemn occasion the cake was meant to commemorate, such as skulls, bones and coffins. Catafalcoes made of wood and painted black, from six inches to two and a half feet in height and from three inches to two feet square, were also a highly popular article of merchandisc. Some of them consisted of several platforms rising one above the other, elaborately draped with black cloth and emblazoned in gilt with crosses, skulls, bones and coffins. There were skeletons of every imaginable size and material upon the counter of every booth, some of them poor, cheap affairs of paper, many of candy and others elaborately con-structed of wood and jointed so that the pulling of a string would cause them to dance and caper in a weirdly comical way. Some of them were fantastically dressed like ballet dancers and were surrounded by groupe of

EVERYBODY BUYS THEM. All classes seem to have turned out en masse to purchase these mementoes of the time. Men and women of the highest wealth and culture, accompanied by groups of beautifully dressed, merry children, whose hands are full of soul cakes, skeletons, catafalcoes and candy skulls, elbow and are elbowed by the poor peons, who are spending the few coppers that they have laid by so carefully for the occasion.

It is a period of universal merriment and rejoicing-a fast and joyous carnival without masks. The shouts and vociferations of the light hearted crowd, and their boundings and gambols in the shadow of the grand old thedral, which for over 200 years has stood at the head of the plaza, were such as might at first have led one to think that the inmates of that philanthropic establishment, the Casa de Locos (lunatic asylum) had forced bolts and bars, and exchanged their straight waistcoats for others of a more elastic and becoming model, while above all there arose from the zocolo strains of such music as we seldom or never hear in the states, for the playing of a Mexican government military band is a revelation of the possibilities of such an organization.-Phila-

delphia Times. A Hint for Society Men.

There is an art about putting on a dress suit which few men are cognizant of. It does not consist in the proper arrangement of the tie or collar, but in the economy of time by doing things in their proper order. We all know how vexing it is to the one's shoes after one has one's shirt bosom nicely arranged. Here is a schedule by following which we think all trouble will be obviated: First, draw on the trousers; second, the shoes; third, shave; fourth, perform the ablutions; fifth, manicure the finger nails; sixth, put on the shirt; seventh, adjust collar and tie; eighth, brush the hair; ninth, coat and velt. -H. D. Wiman in New York Wold.

Red Shades and Pink Newspapers. Red lamp shades are a monstrosity. Dr. Forbes Winslow gives facts to show how injurious to the eyes are the red and yellow rays of the ordinary oil lamps and gas, and shows that a certain amount of blue in the lamp shades will prevent their bad effects. Pink and buff-toned paper for newspapers are a great mistake. The best paper for the eyes is that which is nearly white, with a slight bluish or lilae tint -- Herald of

SHERIFF'S SALE.—Essex County Circuit Court
—Samuel H. Baxter, Benjamin W. Wilson and
George Starr, executors, &c., of Samuel G. Baxter,
deceased, vs. James B. Davis and Mary A. Davis.

Fi. fa.. &c.

By virtue of the above stated writ of fieri-facias to me directed. I shall expose for sale by public vendue, at the Coart House in Newark, on Tuesday, the twenty-first day of December next, at two o'clock P. M., all that tract or parcel of land and premises altuste, lying and being in the city of Newark, Essex county, New Jersey.

Beginning on the east side of East Broad street at the northwest corner of lot No. one and at a peint distant forty-five feet northerly from Jeremiah Doyle's lot; thence along said street north twenty-two degrees and forty-five ininutes east forty-five feet toflot No. three; thence along the line of lot number three at right angles to said street south sixty-seven degrees fifteen minutes east one hundred and forty-five feet six inches to the line of lot No. six; thence along the line of Lot No. six; south lot No. six; thence along the line of Lot No. six south ten degrees and ten minutes west twenty five feet nine inches to lot No. one; thence along the line

nine inches to lot No. one; thence along the line thereof south eighty-nine degrees and thirty minutes west fifty-six feet; thence along the same at right angles to said street north sixty seven degrees and fitteen minutes west one hundred feet to said street and the place of beginning. Being lot No. two on a map of the Elias Tomkins property in Newark, New Jersey, surveyed September twelfth, A. D. eighteen hundred and sixty-six, by L. D. Tompkins. Being the same premises recorded in Book E, 13 of Deeds for E sex County, on pages 272 and 273.

Also all those tracts or parcels of land and premises situate, lying and being in the township of Bloomfield, in the county of Essex, and State of New Jersey.

First Tract—Beginning on the west side of the Newark and Pompton tumpite road at the northeast corner of Joseph F. Ward's house let; (1) thence along the line of the said Joseph F. Ward's land south sixty-seven degrees west three chains and eighty-three links; (2) thence south sixty three degrees a d thirty minutes east ninety-seven links along the line of said Ward's land; (3) thence north sixty seven degrees east three chains and eighteen links along Daniel W. Thompson's line to the turnpike; (4) thence north twenty-three degrees turnpike; (4) thence north twenty-three degrees west seventy-eight links along said turnpike road to the place of beginning, containing twenty-seven hundredths of an acre. Being the same premises Peter Henn and wife, by deed dated April 1st, 1856 and recorded in the Cierk's office of said county of Essex, in Book 219 of Deeds for said county, on

Necond Tract—Beginning in the southerly side of Green street on the northeast corner of Emmon B Corby's lot at a point distant from the northeas corner of Railroad avenue and Green street twenty five feet, and from the northeast corner of E. Corby's store six feet and one inch; thence (1) along E. Corby's line south twenty-seven degrees west one hundred and sixteen feet eight inches; tuen e (2) south thirty-eight and three-quarter degrees west forty four feet ten and a half inches; tuence (3) along the northerly side of an alleyway twenty-one feet wide running from the kailroad avenue in the rear of the premises hereby conveyed south forty-six and three-quarter degrees east twenty-live feet one inch; thence (4) along Jacob F. Randolph's line no th forty-two and three quarter degrees line no th forty-two and three quarter deg ees east one hundred and five feet; thence (5) through the centre of an alley between two houses north twenty-four and three quarter degrees east sixty-seven feet ten inches to threen street; thence (6) along the southerly side of threen street north sixty-five and three-quarter degrees west forty one feet two and a half inches to the place of beginning. Being the same premiser conveyed. ginning. Being the same premises conveyed to tue said party of the first part heleto by Jabob F. Randolph and wife, ty deed dated February 1st, 1866, and recorded in the Register's Office of the sid county of Essex, in Book A, 18 of deeds fo

said county of Essex, in Book A, 18 of deeds for sa d county, on pages 300 and 307.

The above premises are conveyed expressly subject to a mortgage for twenty-five hundred dollars now existing thereon, which has been computed as a part of the purchase money herein mentioned and which, together with the interest to become due thereon, the said party of the first part hereto assumes to pay and discharge.

Third Tract—Beginning on the southerly side of Green street at a point distant from the southers. Green street at a point distant from the southeast corner f the tone water table f the bous be longing to Peter. Gerber of eightern feet six inch es; (1) then ealong said Gerbet's line a uth twen ty-four and three quarter degrees west eighty-one feet one and a half inches (this line is paral el w th the eas eriy side of said Gerbets house or store and distant therefrom three inches); (2) th-noe along the line of the same s unth thirty-nine degrees and five minutes west forty-two feet elements. grees and five minutes west forty-two feet elev inches; (3) thence along the same south sixty fou degrees west forty-four feet three inches; (4) thence along the same and the ea-terly side of a line south forty-two and three-quarter degrees we thirty-eight feet two incnes; (5) thence along the said line north forty-six degrees and forty minutes west seventeen feet two inches; (6) thence along C. Twigg's line south forty-two and a quarter de-grees west five feet four inches; (7) thence further c. Twigg's line south forty-two and a quarter degrees west five teet four inches; (?) thence further along the same south twenty and a quarter degrees east one hundred and five feet and seven inches to Wright F. Conger's line; (8) thence along the same south eighty-five degrees east thirty-six feet six inches; (9) thence along the same north sixty-six fand one half degrees east thirty-two feet four inches to a corner of Joseph B. Harvey's let; (10) thence along sait Mervey's line north twenty-two degrees west one hundred and twelve feet nine inches; (11) thence further along the line of the same north sixty-eight degrees east one hundred and four feet nine inches to a corner of Jacob G. Post's lot; (?) thence along said Post's line sorth twesty-one and a half degrees west eight feet four inches; (13) thence along the same north sixty-eight and a half degrees east seven feet two inches; (14) thence along the same north twenty-one degrees and a half west eight feet four inches; (15) thence along the same north twenty-one degrees and Pompton turnplks; (16) thence along the westerly side of the said turnpike north twenty-one and a half degrees west sixty-one feet three inches; (17) thence along the westerly side of Green street north sixty-size and three quarter degrees west one foot and six inches to the beginning, on the front measures from the northeast corner of said Jacob Post's lot sixty-two and a half feet from the front measures from the northeast corner of said Jacob Post's lot sixty-two and a half feet from

the front measures from the northeast corner ; said Jacob Post's lot sixty two and a half feet from the beginning.

Excepting therefrom that portion thereof taken
by the Essex Public Road Board in the widening of

Sloomfield avenue.
